SUMMARY

Final-year Information Management student with hands-on experience building and deploying machine learning, deep learning, and generative AI systems using Python, LangChain, and Hugging Face. Completed multiple end-to-end AI projects spanning data preprocessing, model training, API development, and production deployment. Seeking to advance applied AI skills through structured mentorship and project-driven learning.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Machine Learning	Scikit-learn, TensorFlow, Regression, Classification, Feature Engineering, Model Evaluation, Cross-validation
Deep Learning & NLP	Neural Networks, Text Processing, Hugging Face Transformers, Sentence Transformers, Embeddings
Generative AI	LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Chains, Vector Search
MLOps & Tools	FastAPI, Streamlit, Docker, Git, GitHub, REST APIs

PROJECTS

AI-Powered README Generator / <i>Python, LangChain, FastAPI, Hugging Face, Docker</i>	2025
- Built a generative AI application that clones any public GitHub repository, analyzes its structure, and auto-generates professional README files using Flan-T5 and Mistral LLMs via LangChain. - Implemented 10+ LangChain components: prompt templates, LLM chains, document loaders, recursive text splitters, output parsers, and batch processing pipelines. - Architected a production-ready async FastAPI backend with Docker containerization, service-layer design, and intelligent fallback mechanisms ensuring 100% uptime. github.com/bikeeprajapati/readme-generator	
Fraud Detection ML API / <i>Python, FastAPI, Scikit-learn</i>	2024
- Trained and deployed classification models for real-time fraud detection, exposed via RESTful APIs with structured inference pipelines and model evaluation metrics. github.com/bikeeprajapati/fraud-detection-ml-api	
Smart Resume Parser / <i>Python, NLP, spaCy</i>	2024
- Built an NLP information extraction pipeline to parse unstructured resumes and output structured fields: skills, education, and work experience. github.com/bikeeprajapati/smart-resume-parser	
Regression Modeling: Insurance & Housing Prices / <i>Python, Scikit-learn</i>	2024
- Developed regression models with feature engineering and cross-validation to predict insurance premiums and house prices; compared multiple algorithms by RMSE and R^2 score. github.com/bikeeprajapati/house-price-ml-api	
AI Currency Converter / <i>FastAPI, Streamlit</i>	2024
- Developed a full-stack AI-powered currency conversion tool with a FastAPI backend and interactive Streamlit frontend. github.com/bikeeprajapati/currency-converter-app	

EXPERIENCE

Software Developer Trainee — Drupal / <i>ITONICS, Kathmandu</i>	2025 · 1 month
Completed intensive training in enterprise CMS development using Drupal; worked on module configuration, content types, and team-based agile workflows.	
WordPress Developer Intern / <i>Idea Gen, Kathmandu</i>	2024
Developed and optimized WordPress websites; improved page performance and responsive UI in collaboration with design and backend teams.	

EDUCATION

Bachelor of Information Management (BIM) / <i>Shanker Dev Campus, Tribhuvan University</i>	2021 – 2026 (Expected)
Relevant Coursework: Artificial Intelligence, Machine Learning, Data Management, Business Analytics, Statistics	

CERTIFICATIONS

AI & Machine Learning Training — Next Skills Academy	2024
ML pipelines, API integration, LLM fundamentals, Prompt Engineering, RAG-based workflows
